

BOSS 4.0

More than Just a License Plate

Providing the latest platform for law enforcement to detect, prevent and solve crimes aided by the latest vehicle detection and recognition Solutions.

Intuitive Design

Designed for law enforcement professionals, building upon 20+ years of market experience – ensuring ease of use.

Security, Data Ownership & Sharing

Take control of your data in a secure manner - you decide who it is shared with, whether it is neighboring law enforcement agencies, or other municipal agencies. IT IS YOUR DATA!

Trusted by More than 1,000 Agencies Globally

Processing billions of vehicle reads every year.

Designed for the Cloud

Take advantage of the latest cloud computing technology, whether it is your own private cloud solution or the Neology™ Hosted Cloud solution, to unlock the benefits of speed, scale, infrastructure cost, and system availability.

BOSS 4.0

More than Just a License Plate

Benefits of BOSS 4.0 – Internally Mounted In Car-Video Camera

– Enhanced Search Region with Peer-to-Peer Data Sharing

Powers your data sharing with other BOSS 4.0 systems, enrich your results and support neighboring agencies to unlock leads and solve crimes, all under your control at all times!

– Interoperability

Ability to consume breadth of ALPR data, irrespective of system, supplier, or variant of solution provides ease of migration to new platform.

– Advanced Analytics Engine, Mapping & Reporting

Intuitive searching and analytics, including powerful map-based, multi-location, searching capability. Our MANTIS 4-D Vehicle Recognition solution provides rich data mining capabilities to find the vehicles you are looking for.

– Purpose Built for Law Enforcement

20 years of experience, working with some of the largest agencies using ALPR brings broad feature set, tuned to your requirements.

Accelerating Your Vision

At Neology, we re-imagine mobility to accelerate your vision of a smart city and safer communities.

By closely collaborating with our customers, we connect existing infrastructure assets with next-generation technology to modernize the way people move. Backed by a culture of innovation, we help create safer, cleaner, more efficient mobility experiences that support sustainable growth and help communities thrive.
