

# SAFE IN-PERSON LEARNING | PASSIVE SMART TEMP VERIFICATION SYSTEM | WIRELESS GUARDIAN | CASE STUDY APRIL 2021

## LOUDOUN COUNTY SCHOOLS

**Wireless Guardian is having a tremendous impact getting kids back to school safely in Loudoun County with the approved 1.9 trillion CARES II Act.**

Wireless Guardian and **Synnex** offer COVID-19 Thermographic and Security Solutions offer purchasing vehicles for state, federal, and non-profit entities in any state via the **GSA Schedule, NCPA Contract**, and **Equalis Group** partnership. In Loudoun County over 150,000 kids, faculty, and staff are being passively tested daily and Wireless Guardian has proven to identify cases successfully, preventing the spread of COVID-19 to students and teachers in the county.

*"The Wireless Guardian solution has reduced the burden on our district's staff and provided flexibility to the schools and stakeholders to screen passively, in real-time or as-needed for live peak-time COVID-19 monitoring. The efficiency of the system (scanning 45 people per second), ease of use and data readability, and potential for scalability have been key factors for our decision to go with this technology. We are excited to see how we can continue to hone in on key features in future years to come as we expand our capabilities on mitigation." Justin Donovan, Director of Digital Experience for Loudoun County Public Schools*

The Wireless Guardian scans masked/non-masked individuals and automatically detects temperatures above 100.4 F/38 C using infrared cameras and AI. By locating people with symptoms of COVID-19 before they enter the facility passively, everyone stays safe and healthy – with 99% accuracy and in real-time. The Wireless Guardian is completely modular and monitored 24/7, making the system perfect for events, transportation systems (buses, trains, etc.), schools, municipal, and public spaces.

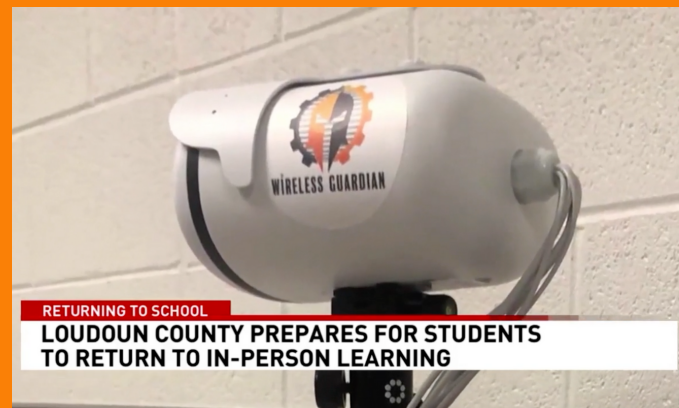

**Visit [thewirelessguardian.com](http://thewirelessguardian.com) for information on the technology and using CARES ACT funding to secure your facility today. | [sales@thewirelessguardian.com](mailto:sales@thewirelessguardian.com)**

### How Loudoun County Schools are Keeping In-Person Learners Safe

LOUDOUN COUNTY, Va. (ABC7) – Nearly 15,000 elementary school students are returning to in-person learning in Loudoun County on Tuesday. Their parents chose the hybrid learning model, which includes two-days of in-person learning a week, as well as a couple of days of virtual learning. “We are very ready for students to come back on Tuesday,” said LCPS Interim Superintendent Dr. Scott Ziegler.
