

SMART CAR

WIRELESS GUARDIAN

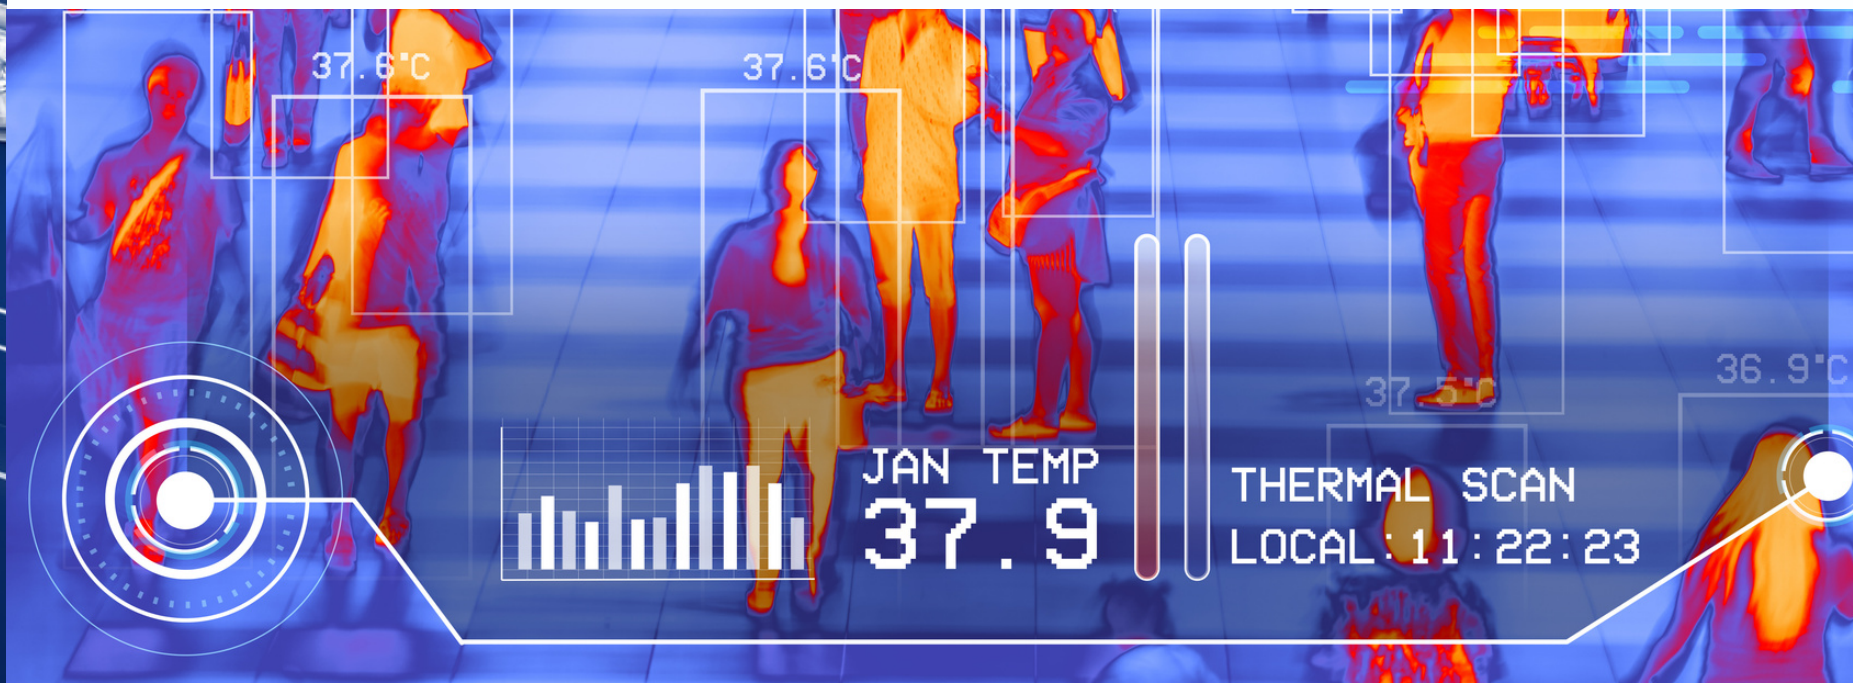

Comprehensive Protection with Patented Technology
Mitigating the risk of theft, violence, and disease

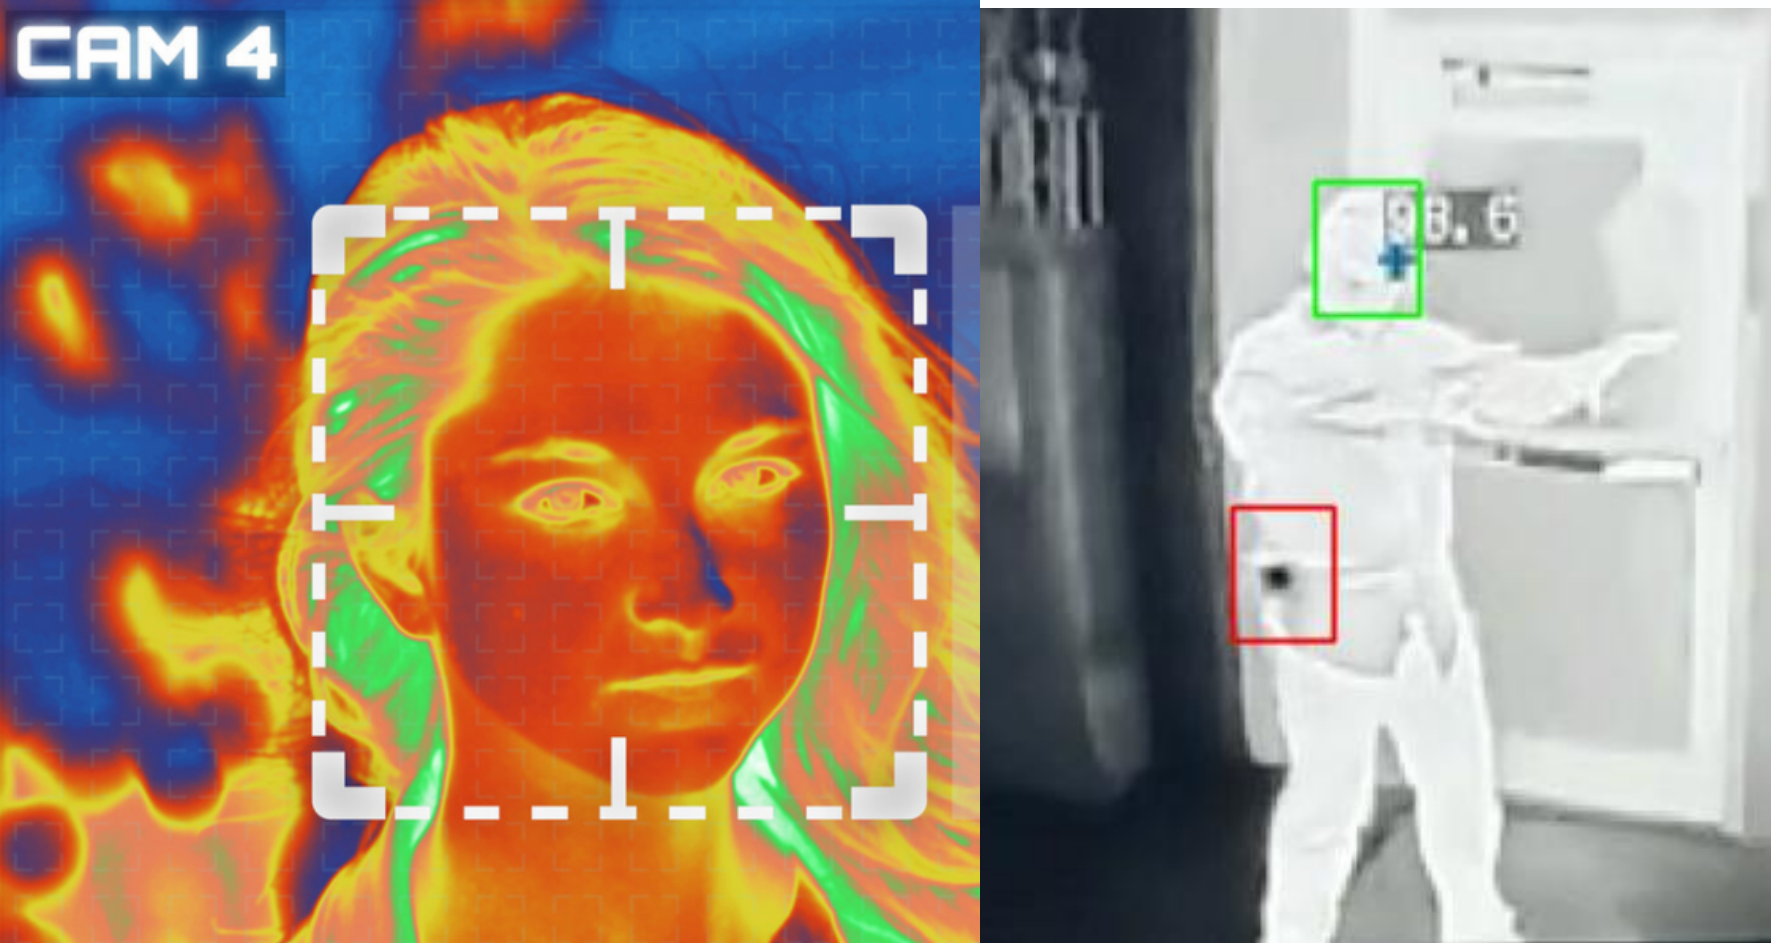

Our Solution

A three-tiered, patented, and comprehensive approach will prevent threats from entering the vehicle vicinity while processing signals intelligence to identify known threats.

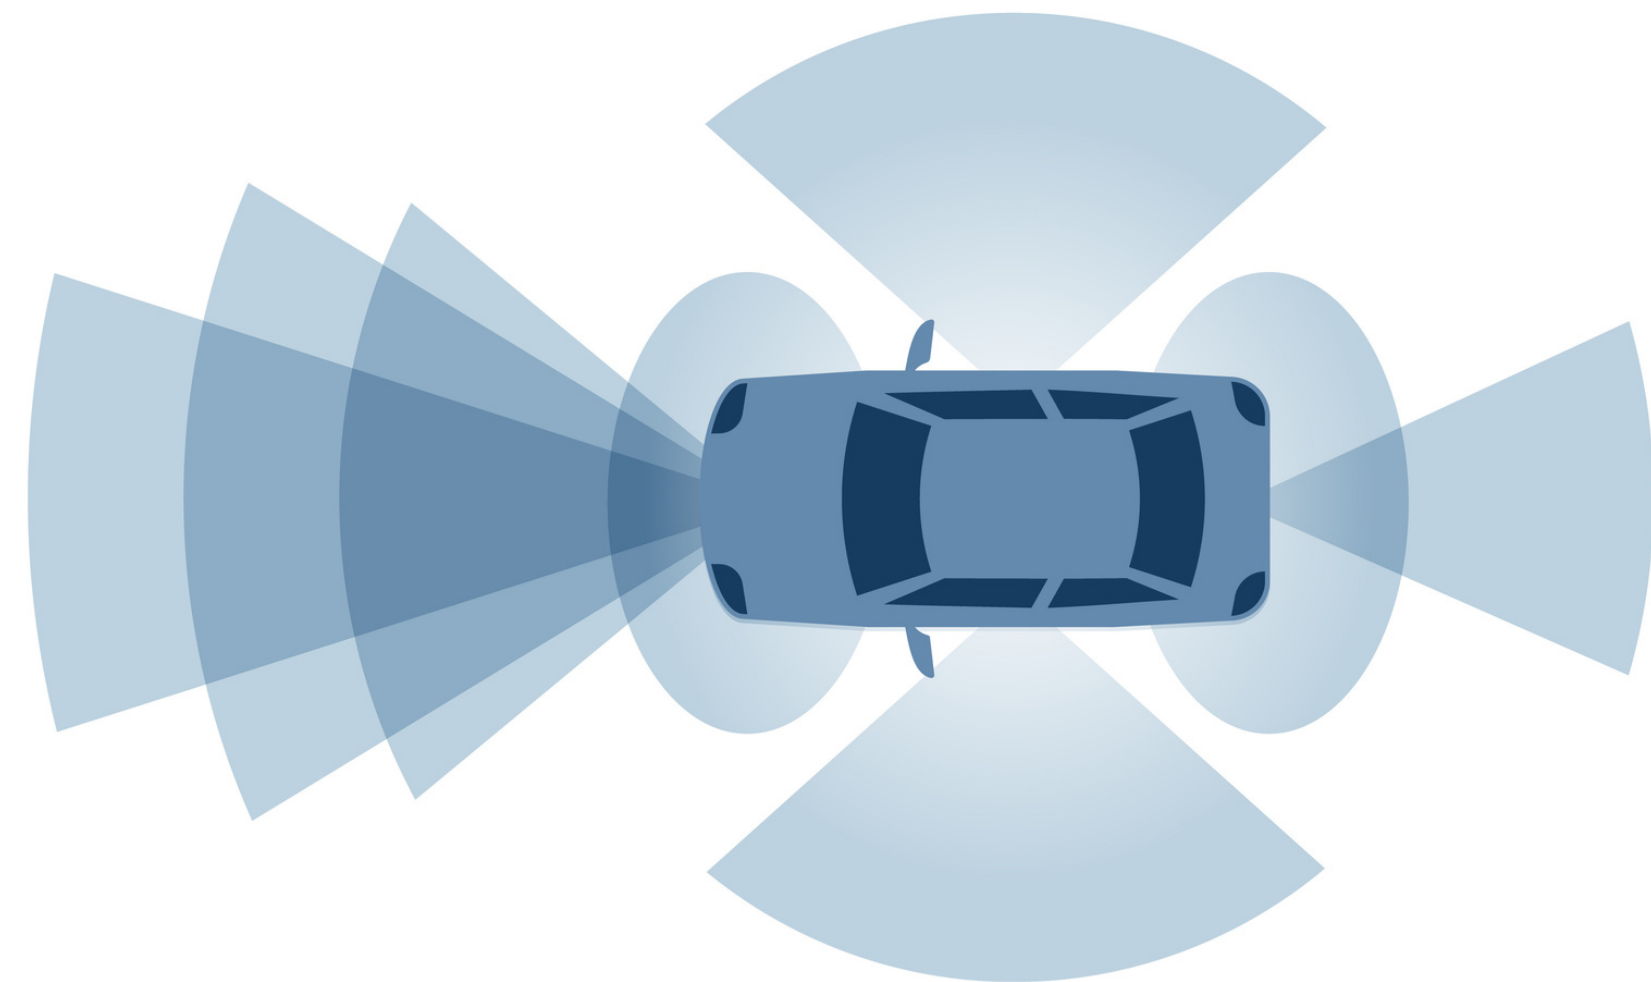

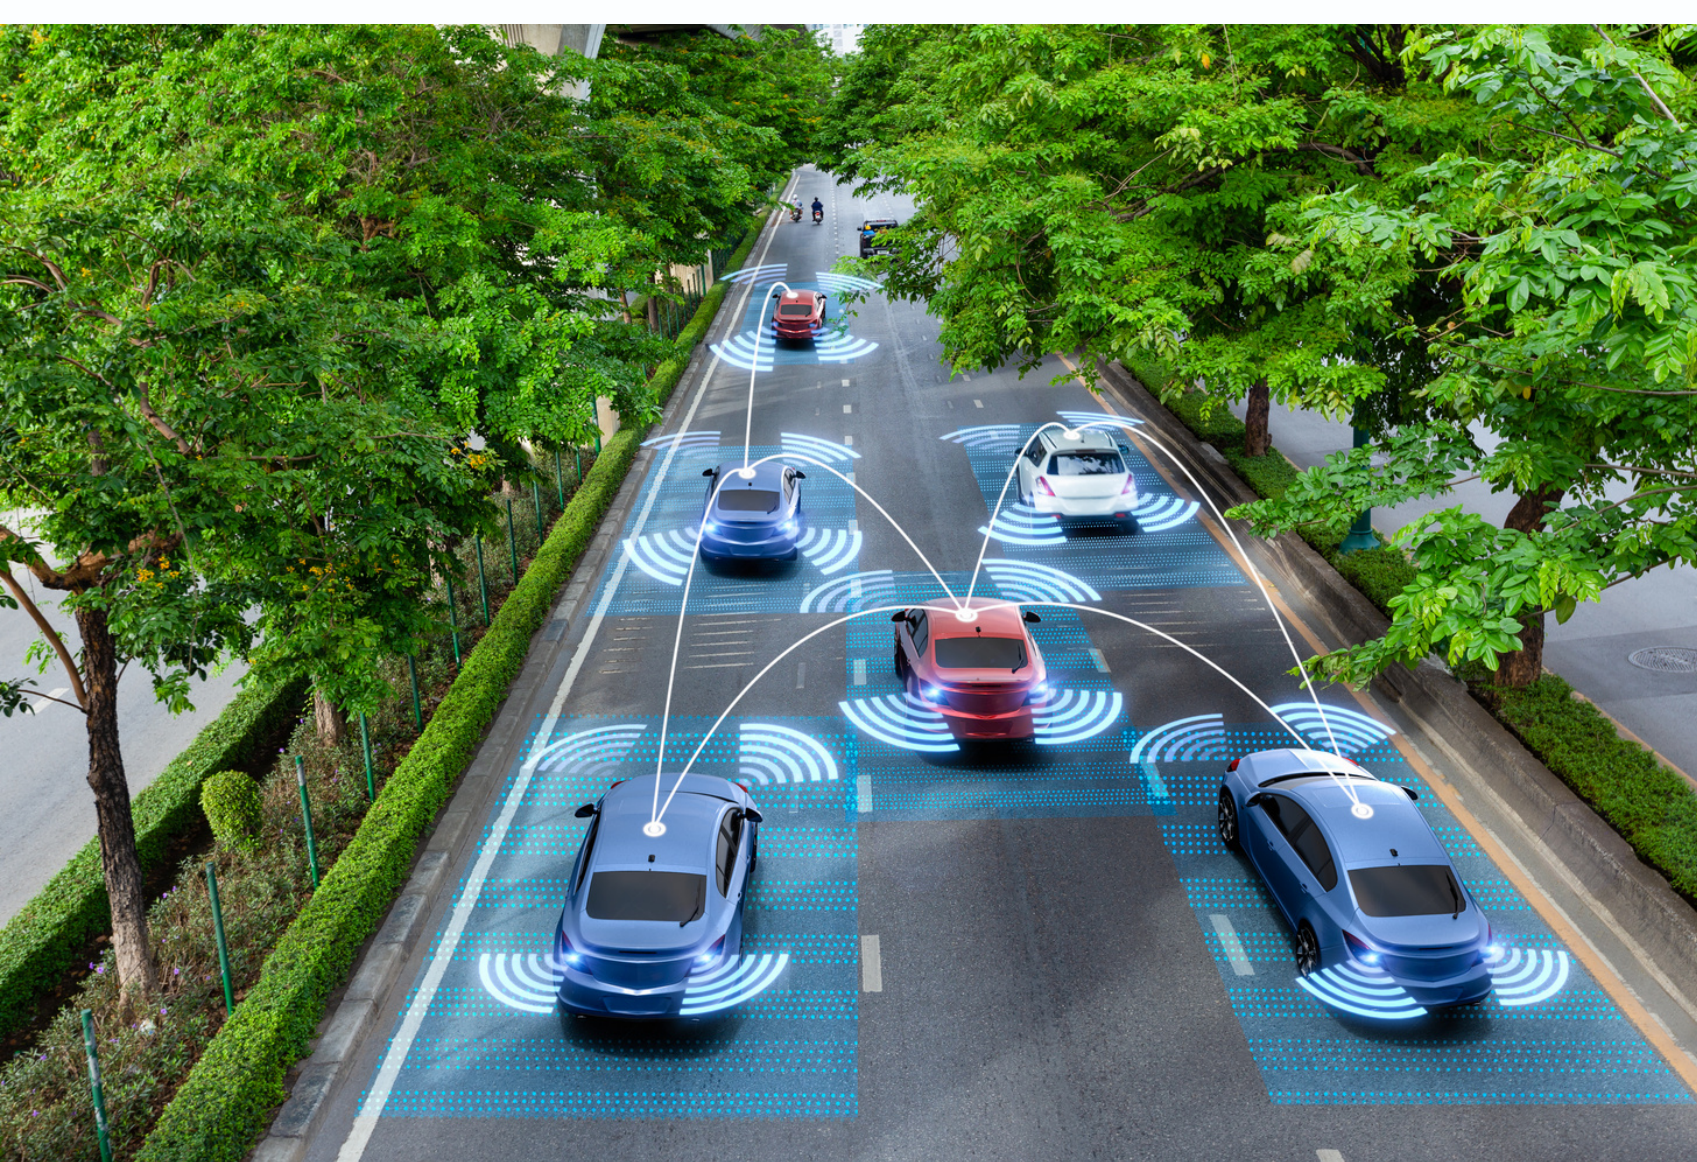

Tier 1: Thermographic Cameras to Scan for Weapons and Temperatures

Our thermographic cameras are empowered with artificial intelligence.

Identify open or concealed weapons, disease, explosive devices, long blades, and other threats.

FDA approved with 99% accuracy for registering temperatures even while wearing a mask.

Tier 2: Signals Intelligence of all Patrons

The system will scan every device within range of the vehicle.

The device ID's collected: MAC, IMEI, Wireless Carrier, IP address, and more. All info collected is within US privacy laws and 100% anonymous unless Law Enforcement secures a warrant to unmask the user.

The device info can identify known threats, surveillance efforts, espionage, roadside bombs/threats, and more.

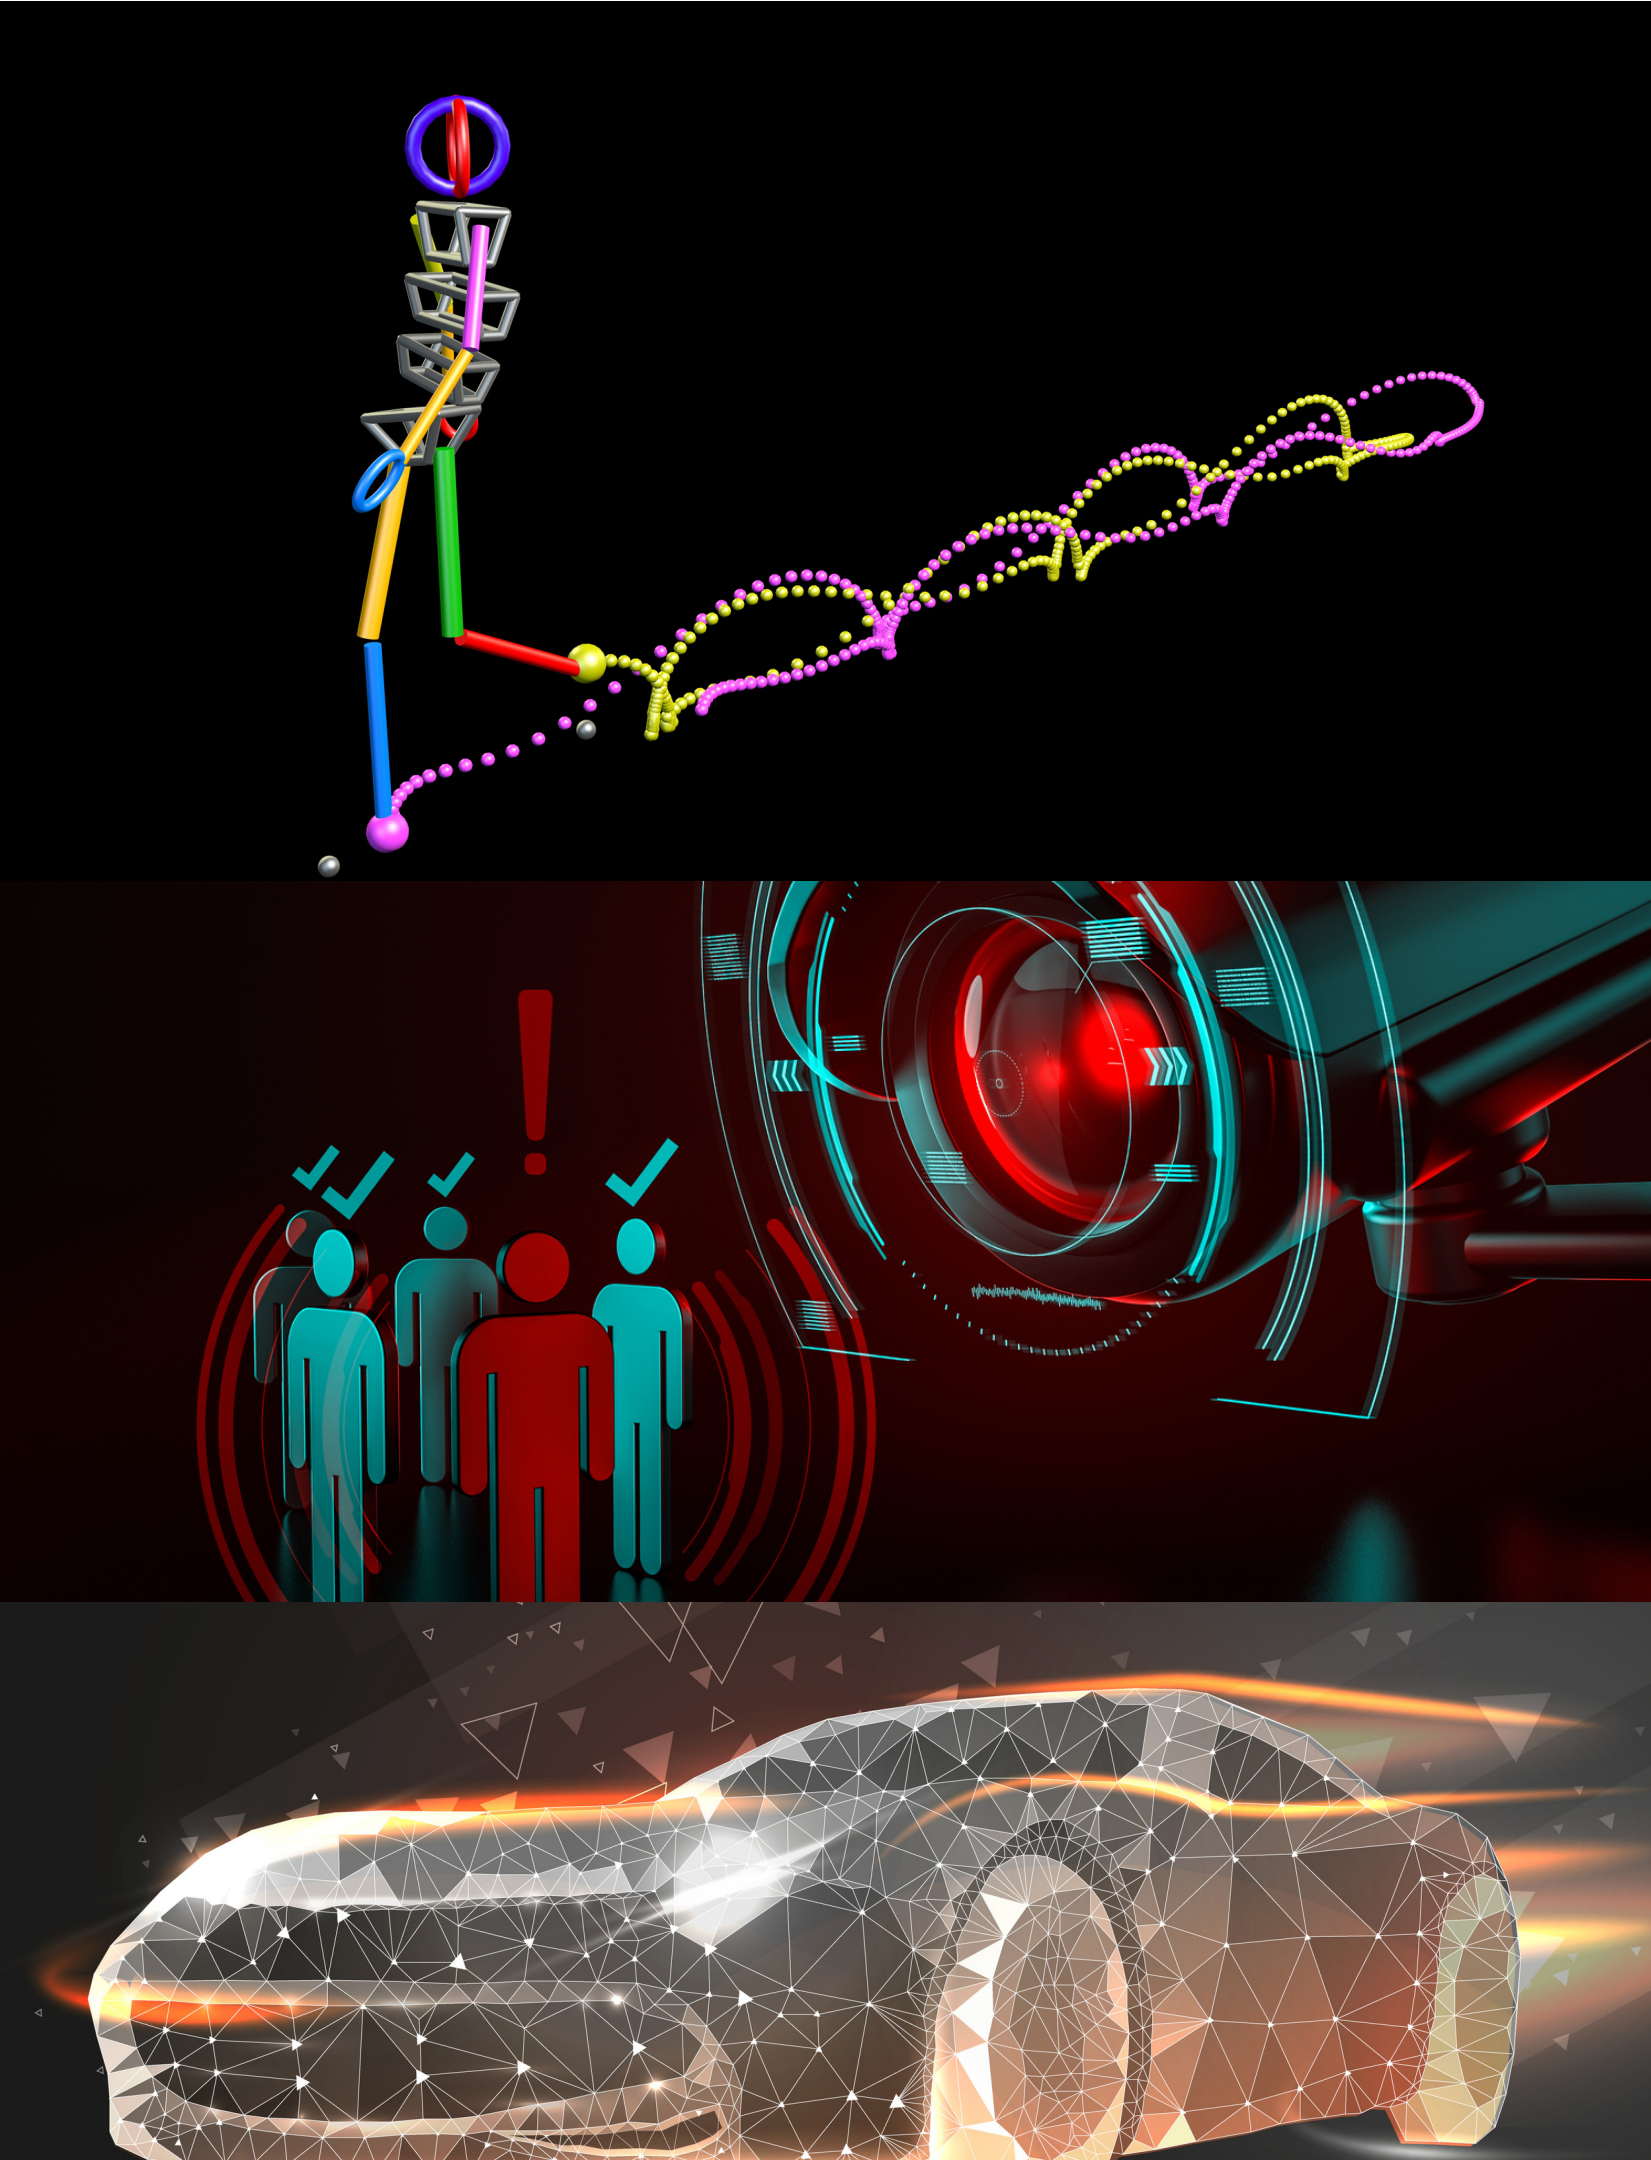

ID Every Wireless Device

Tier 3: Identifying Threats by Individual Movements and Facial Recognition

State of the Art Facial Recognition.

Form Motion Analysis is a Next-Gen Gait Analysis that can fingerprint a person by their movement.

Our artificial intelligence can associate a Threats movement with that of a prior patron to uncover the person's identity.
